copper solution

ABOUT THE COMPANY

Debenhams is a leading international, multi-channel brand with a proud British heritage which trades out of 240 stores across 28 countries. Debenhams gives its customers around the world a unique, differentiated and exclusive mix of own brands, international brands and concessions.

CASE STUDY

Debenhams were consolidating several head office locations, relocating to a single location in the prestigious Brock Street development in Regents Place in London. To realise the benefit of the move, Debenhams required an IT network to provide them with network technical capability to meet the current requirements of the business whilst providing a technology platform to allow for the future demands of their corporate IT strategy when required.

J Brand Ltd provides their customers with a total network solution for all their data communications requirements.

Their reputation is that of a reliable, quality orientated organisation whose customer service is of paramount importance to them and is why their customer base continues to grow.

Having benefited from such levels of service on previously completed projects, Debenhams were delighted to have J Brand on board to deliver the head office network installation.

The obvious structured cabling solution for such a requirement was the Commscope Systimax GigaSPEED X10D Category 6A copper solution that provides 10Gb Ethernet performance for improved bandwidth, data throughput and network efficiency.
